---

### Vision

---

Striving to enhance learning and promote creativity, critical thinking, collaboration and communication through the balanced, authentic and intentional integration of technology.

---

### Career Profile

---

Twenty-seven years in education as a teacher, technology facilitator, technology coordinator and director of technology has provided a deep, conceptual understanding and foundation for building and sustaining a progressive and successful educational technology program.

- Developed, through a Master's degree in Educational Technology, the ability to analyze, design, develop, implement, and evaluate the essential elements of a successful integrated educational technology program.
- Visited and learned from exemplary educational technology programs in a variety of schools in the United States by conducting an on the road one-year research project.
- Master classroom teacher with two decades of experience integrating technology in creative and meaningful ways that enhanced student learning in a variety of private, public and international schools.

---

### Recent Experience

---

#### **American Embassy School / Director of Technology**

July 2014 - June, 2017 New Delhi, India

As the educational technology leader of the school, worked as part of the school leadership team to develop and implement a PK-12 educational technology vision and program. Used data gathered from students and teachers as part of the International Research Collaborative to evaluate our program and plan next steps. Through collaboration drove innovative practice and created dedicated makerspaces in each division of the school. Provided differentiated professional development for 300+ staff members in a collaborative atmosphere. As the operational technology leader of the school collaboratively led the technology systems and support team. Co-planned and implemented numerous system and infrastructure upgrades including the transition to a cloud managed network. Served as cost center manager for the PK-12 technology budget.

#### **American Embassy School / Elementary School Technology Coordinator**

July 2011 - June 2014, New Delhi, India

Through collaboration led the elementary school from a traditional pull-out technology education program to a fully integrated program featuring one of the first 1-1 iPad programs for 700+ K-5 students. Provided differentiated professional development for 100+ staff members including teachers, instructional assistants and support personnel in a collaborative atmosphere. Facilitated positive professional relationships with parents through community outreach programs.

#### **Buffalo State University (COETAIL) / Adjunct Lecturer**

September 2011- May 2013, New Delhi, India

Co-led a cohort and co-taught a series of five graduate level courses that culminated in a Certificate of Educational Technology and Information Literacy.
